

How does
Community Solar billing
work with Solar Landscape's
Arcadia Portal?

Community Solar subscriptions
traditionally involve a dual billing
process, but Solar Landscape's billing
partner, Arcadia is helping provide
a solution to this

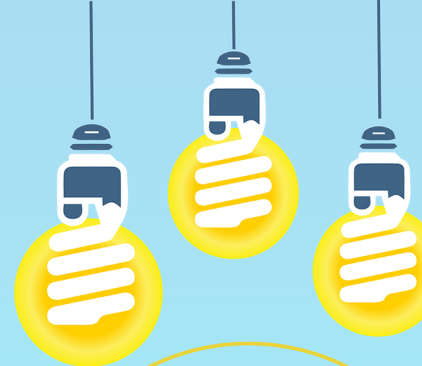

With Arcadia, you link
your utility account and Community
Solar credits through your utility
username and password

Linking your Community Solar
and utility accounts, allows Arcadia
to provide one summary bill.
Even with this system you can still access
your utility account online and view
your bills as before

This process allows you
to see your Solar credits and
it's 25% discount without
delay and in one bill.

Community Solar subscribers
always end up paying less
money for electricity than
non-subscribers
