

Consistent with our Mission, the Sustainable Jersey City Collaborative Network (SJC) encourages community partnerships and neighborhood actions toward making Jersey City a more sustainable place to live and work. In that spirit we are committed to developing more effective ways of working with municipal officials, at all levels and wherever possible. SJC has undertaken three main activities to work with civic-minded stakeholders, which align with [Actions](#) supported by the statewide municipal certification program [Sustainable Jersey](#).

- Community Outreach & Education
- Sustainability Planning for Neighborhoods
- Innovative Demonstration Projects

The above includes developing a broad platform for community engagement and sustainability focused educational opportunities. We bring support and resources – including participatory planning tools and fundraising support – to stakeholder groups for green neighborhood initiatives and have structured a framework for ongoing civic leadership development.

To learn more about our focus, please read [SJC's Charter here](#).
